Project flow	Traffic and capacity analytics for major ports

Description :

Project flow describes **a preset sequence of activities required to plan, produce, deliver and maintain project product, along with information, materials, and resources required by the project**. Project flow is a convenient way to define and plan projects.

Project flow for estimate the traffic and capacity analytics is given below :
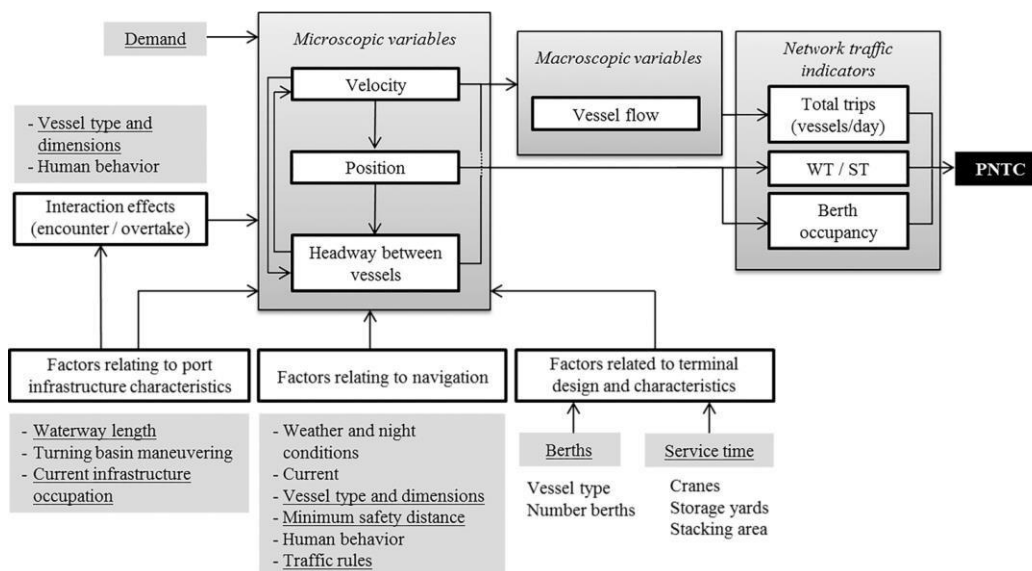

Project flow:

Users create multiple analysis graphs/charts/Visualizations.
- Using the analyzed chart creation of Dashboard is done.
- Saving and visualizing the final dashboard in the IBM Cognos Analytics.

To accomplish this, we have to complete all the activities and tasks listed below:
- IBM Cloud Account
- Login to Cognos Analytics
- Working with the Dataset

o   Understanding the Dataset o
